

1.4 Spatial Concepts

Explain how the image reflects one or more of the following spatial concepts: *absolute location, relative location, space, place, flows, distance decay, time-space compression, and/or pattern.*

1.5 Human-Environmental Interaction

Objectives and Essential Learning

1.5 Explain how major geographic concepts illustrate spatial relationships.

- 1.5.2 Theories regarding the interaction of the natural environment with human societies have evolved from environmental determinism to possibilism.

Cultural Ecology

The study of how humans interact or adapt to the environment.

Theories have evolved over time due to developments in technology.

Environmental
Determinism
v.
Possibilism

Environmental Determinism

- 18th Century
- The belief that climate and landforms are the most powerful forces shaping human behavior and societal/cultural development.
 - Used to justify racism.
 - Concludes that warmer climates tend to cause inhabitants to have a more relaxed attitude toward work and progress. This led some ppl to believe that Europeans and those from more temperate climates were more motivated, intelligent and culturally advanced than those of warmer climates.

▼ Drylands Vulnerable to Desertification and Their Categories

The environment (climate/precipitation) DETERMINES or controls what can happen in these areas! What do you know about what happens in these areas? Farming? Clothing? Etc?

Possibilism

- More modern interpretation.
- Acknowledges the limitations imposed by the natural environment, but focuses on the role of human culture to modify and respond to the environment to better fit human needs.

The Palm Islands were completed in only four years, with each island using over 53 million pounds of sand and 12 million pounds of rock to be created. Located in Dubai, UAE. How does this demonstrate possibilism?

The Hoover Dam, which finished construction in 1936, is utilized to supply power and water to the nearby town of Las Vegas, Nevada which is located in the middle of a desert. How does this demonstrate possibilism?

Invented by the Inca people who lived in the South American mountains. This farming method has made cultivation of crops in hilly or mountainous regions possible. It is commonly used in Asia by rice-growing countries such as Vietnam, Philippines, and Indonesia. How does this demonstrate Possibilism?

Objectives and Essential Learning

1.5 Explain how major geographic concepts illustrate spatial relationships.

1.6

Scales of Analysis

Objectives and Essential Learning

1.6 Define scales of analysis used by geographers.

- 1.6.1 Scales of analysis include global, regional, national, and local.

1.6 Explain what scales of analysis reveal.

- 1.6.2 Patterns and processes at different scales reveal variations in, and different interpretations of data.

Scales of Analysis

Zooming In & Zooming Out
to tell a story.

Global

Regional

State- Country - National

Sub-State (State)

County

City/Local

Census Tract

Scales of Analysis

Small scale maps: show LARGE area with SMALL amounts of data.
Zoomed OUT. BIG # on map.

Large scale maps: show SMALL area with LARGE amounts of data.
Zoomed IN. Small # on map.

Global Scale Map - National Level of Analysis

Share of the population living in extreme poverty, 2017

Extreme poverty is defined as living with per capita household consumption below 1.90 international dollars per day (in 2011 PPP prices). International dollars are adjusted for inflation and for price differences across countries.

Figure 2.
Percentage of People in Poverty
for the United States and Puerto Rico: 2018

National Scale Map - County Level of Analysis

Different scales reveal variations in spatial patterns.

Census Tract: Smallest scale of analysis - comprise about 1,000-8,000 ppl

Closest to the size of an actual neighborhood.

Regional Scale of Analysis

Objectives and Essential Learning

1.6 Define scales of analysis used by geographers.

1.6 Explain what scales of analysis reveal.
