

1.5 Human Environmental Interaction/1.6 Scale of Analysis

Per capita CO₂ emissions from domestic commercial passenger flights, 2021

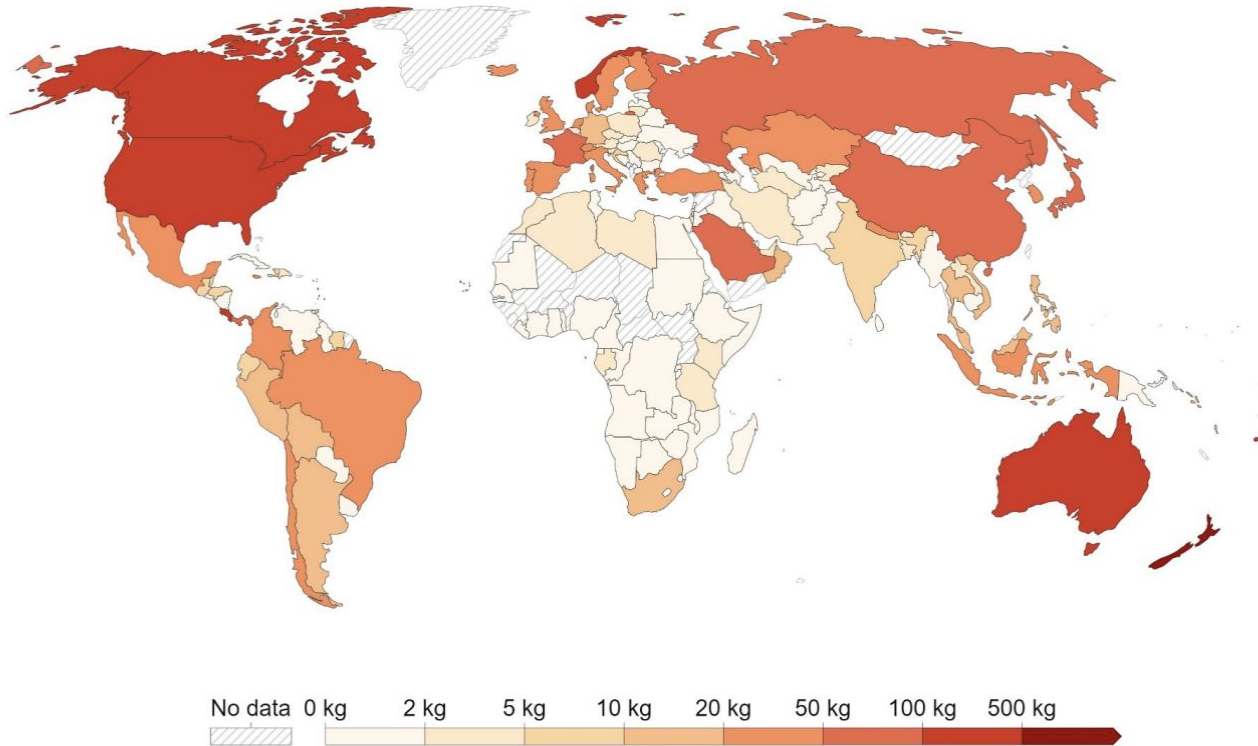

Domestic aviation represents flights which depart and arrive within the same country.

A. Identify the scale of analysis of the map.

B. Explain how the data shown in the map for the United States might be different if it were presented at a more local scale of analysis.

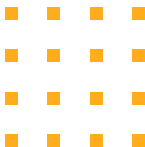

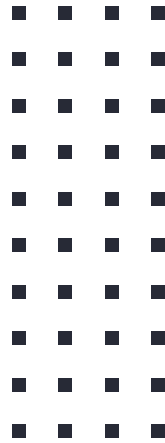

C. Explain why some countries have significantly higher per capita carbon dioxide emissions from domestic commercial air travel than other countries.

1.7

Regional Analysis

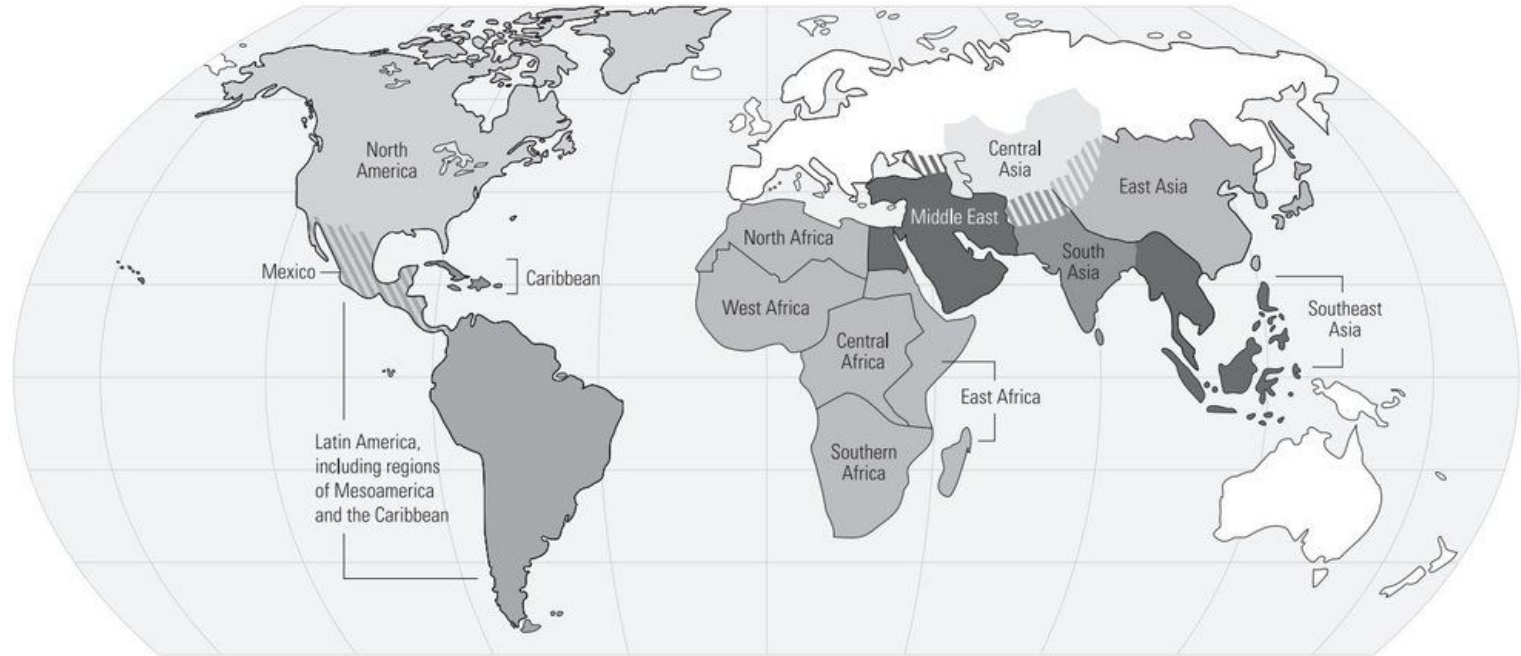

Objectives and Essential Learning

1.7 Describe different ways that geographers define regions.

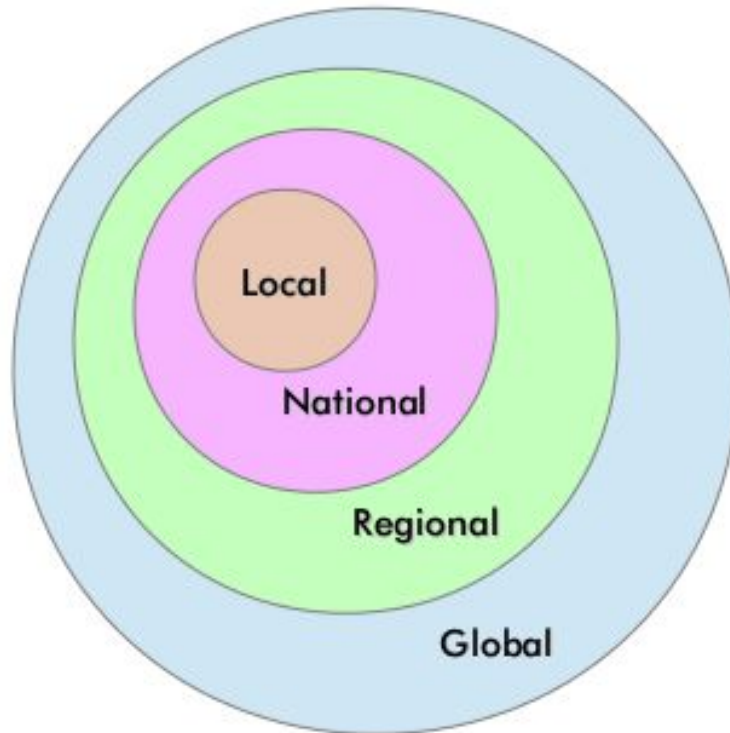

- 1.7.1 Regions are defined on the basis of one or more unifying characteristics or on patterns of activity.
- 1.7.2 Types of regions include formal, functional, and perceptual/vernacular.
- 1.7.3 Regional boundaries are transitional and often contested and overlapping.
- 1.7.4 Geographers apply regional analysis at local, national, and global scales.

College Board – AP Human Geography Regions

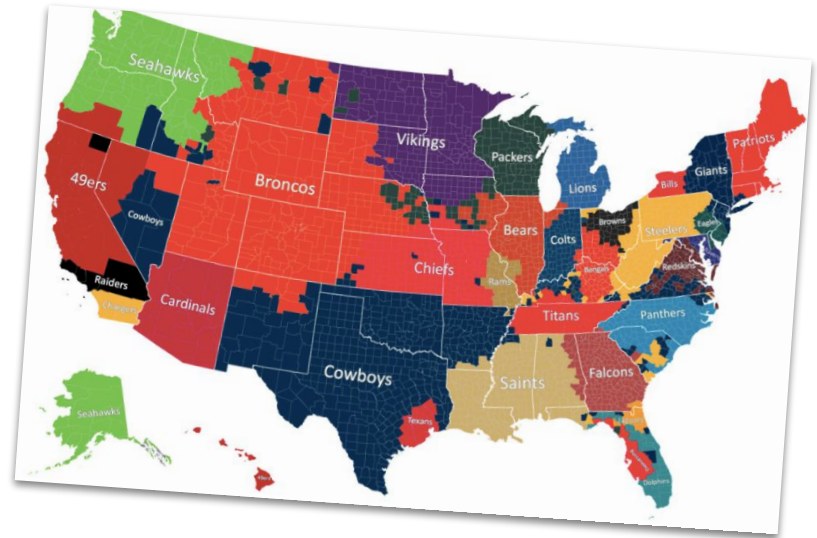

Geographers apply regional analysis...

Regions are defined as...

one or more unifying characteristics (human or physical) or patterns of activity.

1. Formal
2. Functional
3. Vernacular/perceptual

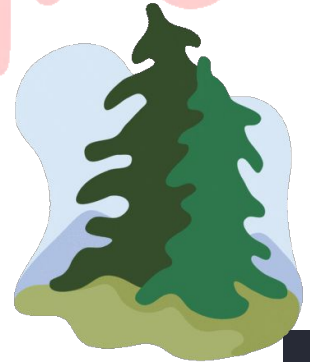

A formal region is...

united by one or more specific traits.

- a. Economic
- b. Social
- c. Political
- d. ENvironmental

Also part of the EU (not shown):

- Canary Islands (Spain)
- Madeira (Portugal)
- Azores (Portugal)
- Many (but not all) French overseas territories

Faroe Islands (Denmark)

Isle of Man (UK)

Guernsey (UK)

Jersey (UK)

Switzerland (CH)

Vatican City

San Marino

Monaco

Andorra

Ceuta (Sp.)

Gibraltar (UK)

Morocco (MOR)

Algeria (ALG)

Tunisia (TUN)

Malta

EUROPEAN UNION

- Current member
- Official candidate
- Recognized as a potential candidate
- Former member

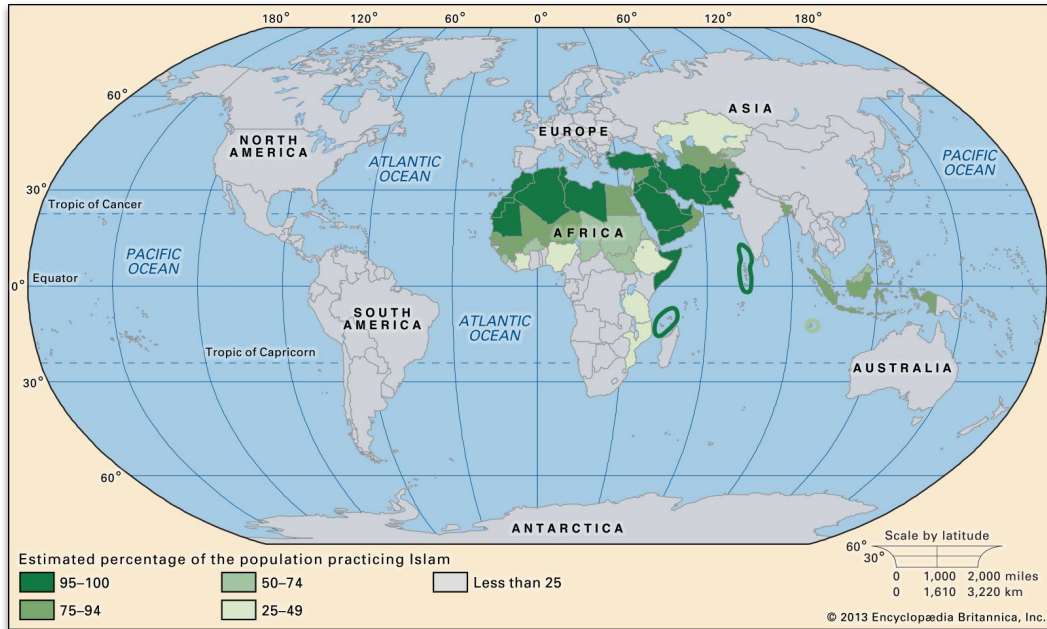

(As of February 2020)

Borders depicted as they are recognized by the EU.

This map illustrates the geographical distribution of European Union member states and territories as of February 2020. Member states are shown in dark blue, while official candidates are in medium blue. Territories recognized as potential candidates are in light blue, and former members are in red. The map includes labels for various countries and territories, such as Iceland, Norway, Sweden, Finland, Denmark, Germany, France, Spain, Portugal, Greece, Turkey, and others. It also highlights specific territories like the Faroe Islands, Isle of Man, Guernsey, Jersey, and Gibraltar. A legend in the top right corner defines the color coding for different EU statuses. A note mentions that borders are depicted as recognized by the EU.

Environmental (Physical)

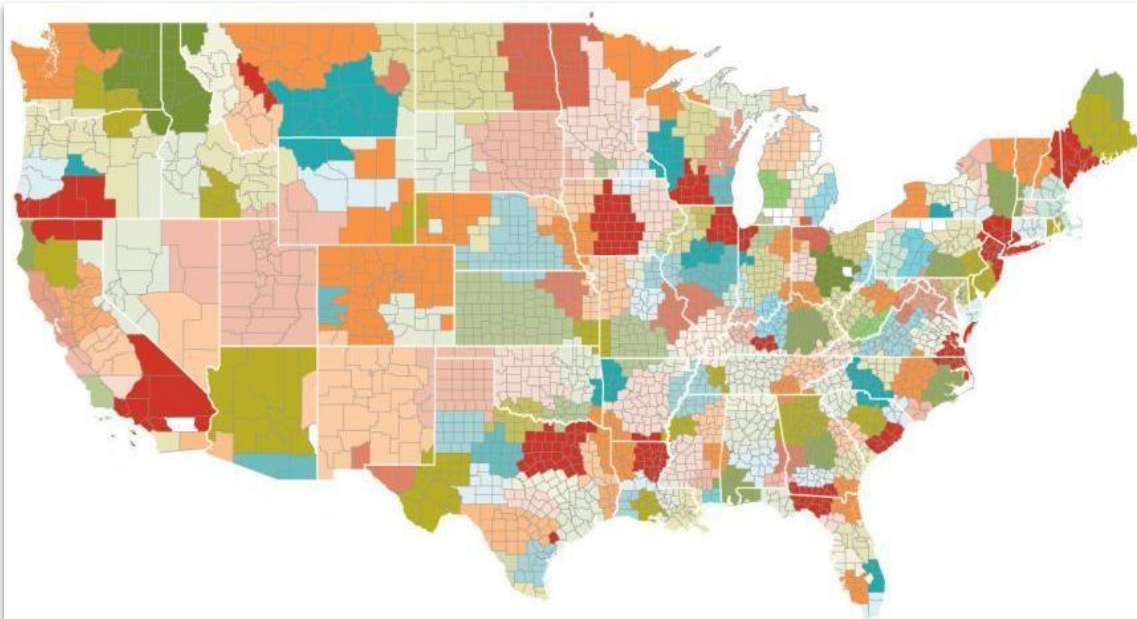

The Sahara Desert: Desert region which separates N Africa and Sub-Saharan Africa.

A functional region is...

organized around a central node (focal point) and the relationship is typically based around economics, travel or communication.

A functional region is...

© 2010 Pearson Education, Inc.

Functional Region: Television Markets - organized around a node of focal point – broadcast signal (note the outlines of the states and counties are formal regions)

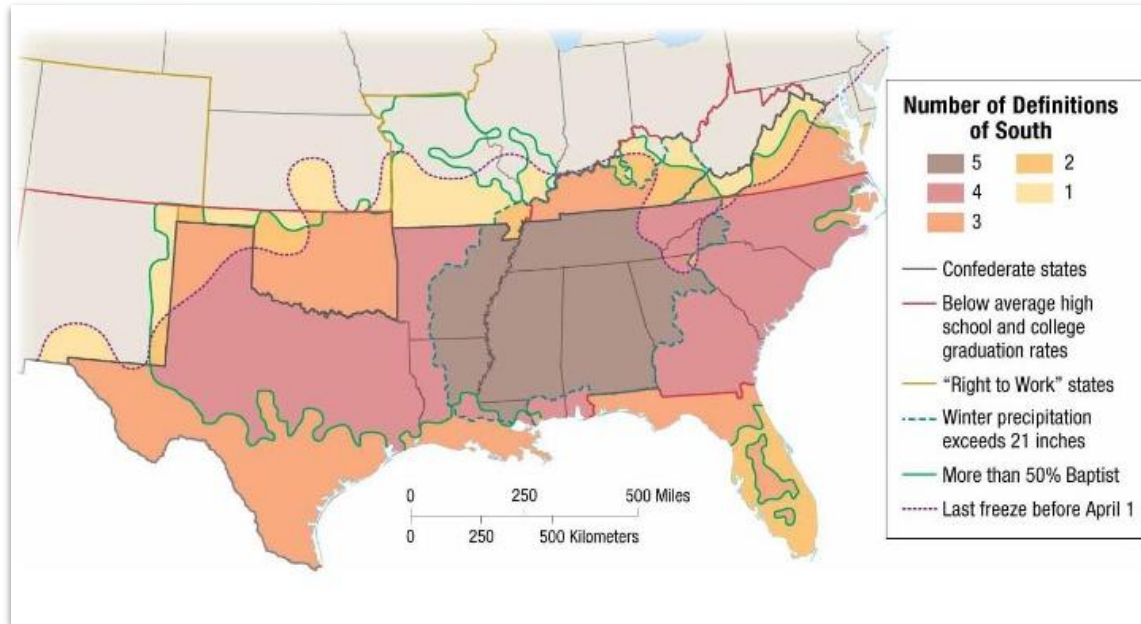

A perceptual/vernacular region is...

based on a person's perspective or perception of a certain location.

- Informal
- Sense of place & cultural identity.
- Boundaries often vary widely because people have a different sense of what defines and unites these regions

A perceptual/vernacular region is...

The South?

Regional boundaries are...

Transitional, Contested, Overlapping

Regional boundaries are...

Transitional, Contested, Overlapping
