Examples: Explain

Explain why Disney Princesses are commonly shown in pastel colors.

Answer: Because colors red, black, and purple are the most memorable psychologically because they imply danger. Disney wants viewers to remember the actions of villains so that they won't repeat them. Therefore, characters like Scar and Jafar are usually shown in red, black, and purple. Princesses are shown in pastel colors in order to contrast their "good" with the villains "evil" in the story

Examples: Explain

Explain why ice cream is more popular than other types of dessert.

2-3 sentences

Students, write your response!

Examples: Compare

Question: Compare two Disney Princesses.

Answer: Elsa and Moana are both in leadership positions in their societies. Elsa is set to become the Queen of Arendelle while Moana is set to become to Queen of Motunui. Additionally, both Princesses flee their kingdoms before eventually returning home to rule. Water is a central aspect of both of the princesses stories. The geography of both princesses are different. While Elsa rules Arendelle, a kingdom set in Scandinavia, Moana rules Motunui, an island in the Pacific Ocean. Finally, Moana's parents are still alive to support here, while Elsa's parents died in a shipwreck when she was young.

Examples: Compare

Compare (and Contrast)
two different ice cream
flavors

5-6 Sentences

Examples: To what Degree

Question: Explain to what degree Disney Princesses affect children's confidence development.

Answer: Seeing Disney Princesses and their stories can have a LARGE IMPACT on children and their confidence. Children can watch stories like Moana where she saves her home, or Elsa who learns to love herself and her powers. These uplifting stories can be positive examples to children on ways to deal with struggles in their own lives because they have good role models.

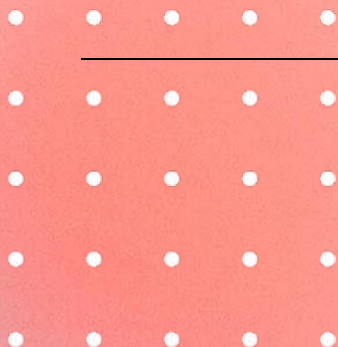

Examples: To what Degree

Explain to what degree the brand reputation influences the perceived taste and satisfaction of ice cream.

3-4 Sentences

Students, write your response!

Reminders

- Skim your FRQs, then make an outline.
- In order to pass, need 12/21 points.
- Label A. B. C. D. E. F. G.
- Each strand is one point.
- No double dipping
- Give examples frequently
- Use Vocab in context
- Identify topic, timeframe, key concepts, and command words.
- Give space between answers.
- Do not restate prompt.
- No anti-examples.
- Short answers are risky.
- Always review answers
- WRITE LEGIBLY!

Checklist for FRQ's

Does it meet the
length
requirement?

For compare
Questions: Does
it close the loop

Does it use the
expected
vocabulary
words?

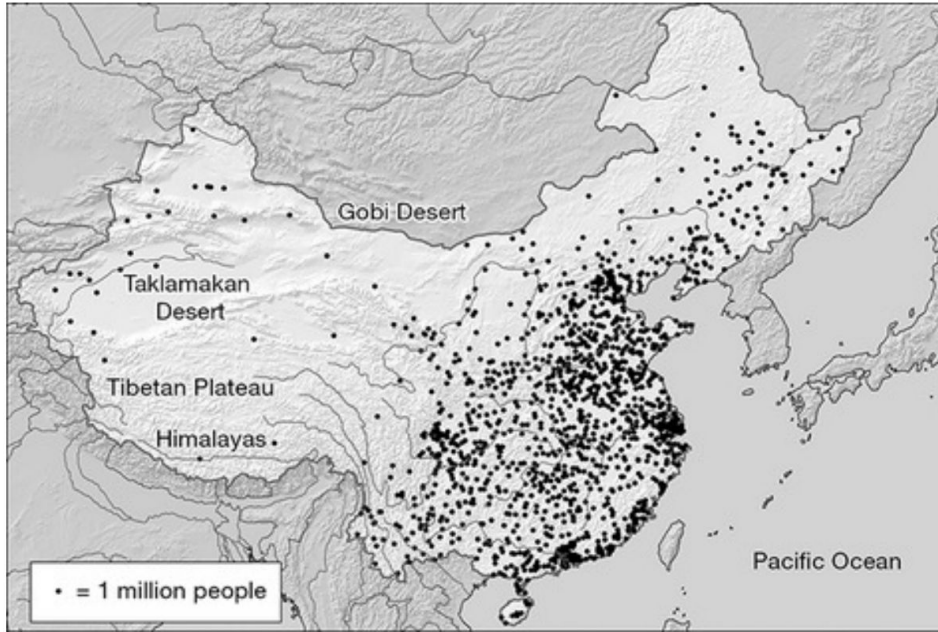

Does it FULLY
answer the
question?

Time to write!

A. Identify what each point symbol on the map represents.

B. Identify TWO topographic features shown on the map.

C. Describe TWO ways that topography affects the spatial pattern of population distribution shown on the map.

D. Describe ONE way that the availability of natural resources may affect population distribution.

Source: Esri

The map shows the major rivers, mountain ranges, desert regions, and population densities in China. Mapping the distribution of a population is a geographer's first step to understanding where people settle and why some areas have greater population densities than other areas.
